GENEALOGY MAIN TREE & BRANCHES INFORMATION

Not all of the Ricker families have been tied into one tree. To help ease the potential confusion with the different branches, the code letter c: has been established to list the branches. These branches will be added to the main tree as the appropriate relationships are established.

ADDITIONS & CORRECTIONS:

The genealogical section is still quite incomplete and may have errors. It is hoped that descendents from the different branches will continue the research in an attempt to fix the errors and to tie all of the families together into one tree.

To help distribute the work load, it is requested that all information be entered electronically in the correct format and emailed to Clyde Eisenbeis. Contact Clyde for the correct format / current procedure (the procedures continue to evolve as technology changes).

GENEALOGY NUMBERING SYSTEM

There can be considerable confusion with so many families. To ease the confusion, a numbering system is used throughout the entire document. The leading digits indicate the parent's number, and the last digit indicates the placement in the family (i.e. a:3.2 is the second child of the a:3 parents).

-
a: Father
> a:1 First Child
> a:2 Second Child =>
> a:3 Third Child =>
> a:4 Fourth Child
-
a:2 Second Child
> a:2.1 First Child of a:2
-
a:3 Third Child
> a:3.1 First Child of a:3
> a:3.2 Second Child of a:3

Note that a '-' is used instead of a '.' after every fifth character to help distinguish the differences between long strings of numbers ... for example, a:1.2.2.1.1-2.1.2.3.1-3.1.1 CLYDE THOMAS EISENBEIS.

Inventing, fishing, telling humorous stories, singing
German songs and playing cards (whist, gin rummy,
cribbage) were his favorite pastimes.
His inventions covered a broad range. He designed and
built a pop-up toy for his son that was cleverly simple
and entertaining; a combine hitch; a carburetor that
used a kerosene lamp wick; an electrical box with the
ground screw in front; fishing gear; a saw that rotated
a small amount which was enough to cut sheetrock but
not skin. He never had enough money to file patents.
One of his most recognized inventions was a three-wheel
bicycle with two wheels in front instead of back. This
bicycle leans like a regular bicycle and is not rigid
like a tricycle. Designed and built in the 1970s, a
similar design is now available from other companies
as a bicycle and as a motorcycle.
He commented how he had lost his strength – while he
was swinging a sledgehammer at the age of 79. He
retired as an electrician when he was 80 – for a month.
Then he renewed his license, because he was bored. He
Continued working as an electrician until he was 85.
His business card showed his sense of humor,
“Eisenbeis Electric, Semi-Retired Electrician. If you
can’t find your shorts, call Ray!”
